PATSEER

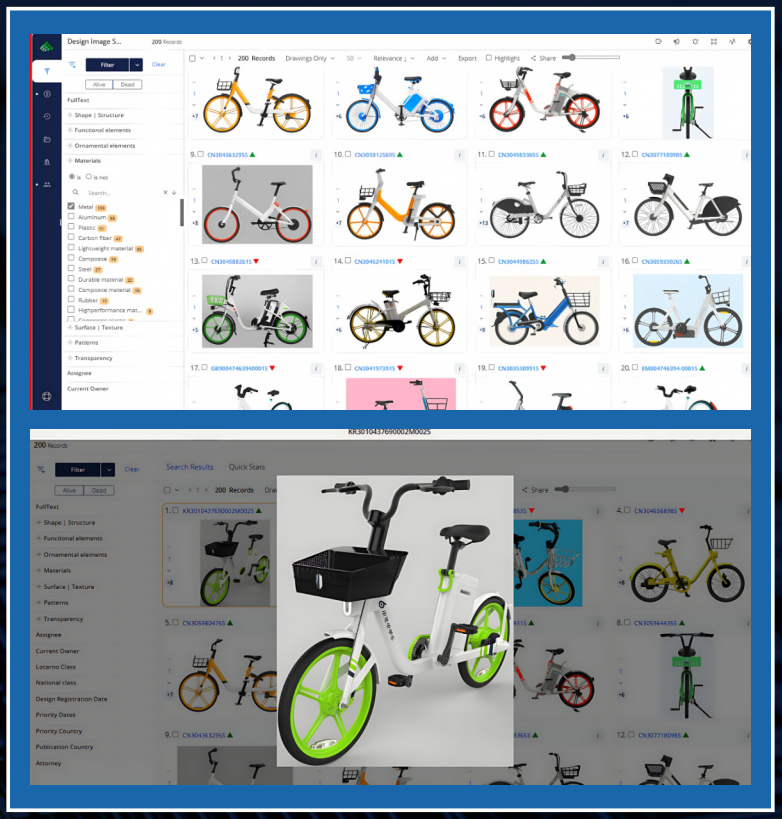
DRIVING INNOVATION

AI-POWERED INDUSTRIAL DESIGN SEARCH

10x More Powerful

Transforming Design Searches with Computer Vision and Image Recognition Technology

- Use leading-edge image recognition technology, trained on millions of design images, to get accurate search results quickly
- Enriched Data with Smart Filters uses a bold new way to refine and search through designs
- Ensures fast loading of images and search results, for quick scan and review designs efficiently



The only Industrial Design solution your will ever need

100%
Productivity

Save up to 90% of your time with AI-driven Design Search

20M+
Design Registrations

Discover records not present elsewhere

86+
Authorities

Worldwide data coverage for robust Design FTOs

CAPABILITIES

- Rapid Image Loading
- National Classifications
- Citation Searching
- Search History
- Translations
- Command-line Queries
- Similarity Searching
- Customizable Exports
- Alerts

Get that matching record in a matter of minutes

PatSeer is an AI-driven IP research platform trusted by 8,000+ professionals worldwide. Covering 170M+ patents from 108+ countries, it delivers comprehensive, accurate insights. PatSeer Designs leverages computer vision and advanced image recognition technologies to simplify industrial design search across 20M+ design registrations from 86 authorities.
